MACROMOLECULES NOTE CATCHER

- _____ are large molecules made up of smaller molecules, or building blocks, that make up all living organisms.
- Monomer: _____ building block or molecule
- Polymer: _____ blocks—when more than one building block or molecule joins together to make a larger molecule
- _____, _____, _____, and _____ are all polymers.

Complete the following table:

Macromolecules	Made up of… (List monomers)	Function	Types
Nucleic Acids			
Carbohydrates			
Proteins			
Lipids
