R.E.R.U.N. RUBRIC

Use this rubric to guide your lab report. In your lab report, include your data analysis answers, the graph that you created, and the R.E.R.U.N. rubric.

In your lab report, answer the question next to each letter in 3–5 complete sentences. Refrain from using unclear words like "something" or "stuff." Instead, fully explain what "something" or "stuff" refers to.

R.E.R.U.N Rubric	Teacher Points		
	1	2	3
Recall: In one paragraph (3–5 sentences), describe what you physically did in the lab. Explain how the lab was done, identify what jobs were completed and who did them, and describe any problem-solving methods you used.			
Explain: Explain the purpose of the lab. What main idea was captured in the lab?			
Results: State the results of the lab. Describe the findings of the lab. Detail the logic you used (explain what that data is telling you).			
Uncertainties: Describe uncertainties and errors that still exist. (Describe any lingering doubts or questions about the results.)			
New: Write two new things you learned.
