Time Frame 35 minutes

Essential Question(s)

How can I increase my ACT score?

Summary

In this culminating reading ACT prep activity, students use the skills they have learned during the ACT prep series. Students practice responding to an ACT-style reading passage and question set then reflect on how well they expect to do on the real ACT. This is the tenth activity in a 10-week "Power Up" series for ACT prep.

Learning Goals

- Select test-taking strategies to use on the ACT reading section.
- Apply ACT reading test knowledge.

- Questions handout (attached; one per student)
- Questions (Teacher Guide) document (attached; for teacher use)

10 minutes

Introduction

Teacher's Note: ACT Enhancements

The following resource has been updated to better align with the test changes that began in April 2025 for the online test and in September 2025 for the paper-pencil test. Some outside resources linked are based on the previous version of the ACT. Learn more about [enhancements to the ACT](#) in 2025.

Introduce the activity using the attached **Activity Slides**. Share the essential question on **slide 3** and the learning objectives on **slide 4**.

Have students take out a piece of notebook paper and move to **slide 5**. Introduce the [Justified True or False](#) strategy to students. Provide time for students to read the four statements on the slide and decide whether each is true or false. Have students write down their answers on their notebook paper with their explanation for choosing true or false. Ask for volunteers to share their justified conclusions with the class. Use the hidden **slide 6** for sample student responses. As students wrap up the ten-week ACT prep series of activities, remind students to keep in mind that all questions should be answered.

Teacher's Note: College Course Placement

If college-bound students graduate high school without obtaining a 19 on the four ACT section tests, advise that they ask about placement tests. Most likely the college they plan to attend offers a placement test, and upon earning a required score, they could potentially avoid remedial courses. Students should talk to the admissions office of the college they wish to attend for more information.

20 minutes

Activity

Pass out the attached **Passage** and **Questions** handouts to each student; then display **slide 7**. Tell students they have ten minutes to read the passage and respond to the questions. Use the [10-minute timer](#) on the slide.

When time expires, display **slide 8** and ask students to check their responses.

Then transition to **slide 9** and have students pair up to discuss their responses with one another. Ask students to share with their partner any specific strategies they used to answer the questions. If students have questions about answers, use the attached **Questions (Teacher Guide)** attachment, which provides explanations for the correct answers to these ACT-style questions.

Sample Student Responses:

- I read the passage before answering questions, instead of reading the questions first.
- I watched the time to ensure I read for only four minutes before answering questions.
- I looked back at the lines in the passage when the question asked about a specific line.
- I read sentences as a whole and did not worry about words I didn't recognize.
- I used the information about the type of passage to predict the types of questions.
- I skipped questions that I did not know where to find the answer in the passage. Then I went back to those questions after answering the others.
- I highlighted the topic sentence of each paragraph to refer to when answering questions.
- I used context clues to understand what some words meant.

5 minutes

Wrap-Up

Move to **slide 10** and review with students how many correct responses on the ACT reading test are equivalent to the overall score. Reinforce that in order to earn a 19 on the ACT reading test, a student only needs to answer 18 out of 36 questions correctly.

Next, display **slide 11** and explain to students that if they usually answer five out of nine questions given in the weekly ACT reading test prep activities, then they should earn more than a 19 on the reading section of the ACT. Reinforce that this is why it is important for students to pace themselves so that all questions can be responded to in the 40 minutes provided.

Move to **slide 12** and remind students they can access a free question of the day on ACT's website by going to my.act.org. Encourage students to keep studying on their own so they can be fully prepared for their upcoming ACT test.

Display **slide 13** and congratulate students on completing the ten-week ACT prep series of activities.

Next Step

- Encourage students to keep practicing their actions from their Goal Setting handout.
- Encourage students to use free time in class to read. Reading every day helps with reading speed - a very helpful skill for all sections of the ACT.
- Remind students of state testing dates and national testing dates. Consider posting this information in your classroom or sharing the following link with students: www.act.org/content/act/en/products-and-services/the-act/registration.html (or suggest they search for "ACT National Test Dates"). It is helpful to not just let students know of the testing dates, but also the registration dates.

Research Rationale

Standardized testing in high schools has long stood as a metric for assessing college readiness and school accountability (McMann, 1994). While there has been debate surrounding the accuracy of such metrics, as well as concerns regarding equity, many institutions of higher education continue to make these scores part of the admissions process (Allensworth & Clark, 2020; Black et al., 2016; Buckley et al., 2020). Aside from admissions, it is also important to keep in mind that standardized test scores can also provide students with scholarship opportunities they wouldn't otherwise have (Klasik, 2013). Though the topic of standardized testing continues to be debated, effective test prep can ensure that our students are set up for success.

With several benefits to doing well on college admissions tests, it is important to consider how best to prepare students for this type of high stakes test. Those students from groups that may historically struggle to find success, such as those from poverty backgrounds or first-generation college students, especially stand to benefit from effective test preparation (Moore & San Pedro, 2021). The American College Test (ACT) is one option students have for college admissions testing that is provided both at national centers and school sites. Taking time to understand this test including the timing, question types, rigor, and strategies for approaching specific questions can help to prepare students to do their best work on test day and to ensure their score is a more accurate representation of what they know (Bishop & Davis-Becker, 2016).
