Essential Question(s)

- What programs or courses align best with my career goals, and how do they differ in terms of curriculum, duration, and potential outcomes?
- What are the enrollment costs, including tuition, fees, and other expenses, and what financial aid or scholarships are available?
- What support services are available, like academic advising, career counseling, and internships, and how can they enhance my education and career readiness?

Summary

Students will explore and experience a mock PSI enrollment event. They will choose a PSI path: college or career tech. They will then be assigned an award letter that outlines the financial aid estimate they can use at their chosen PSI. Next, students will enroll in school and calculate expenses for tuition and fees, housing, meal plan, books, and extras. Along the way, students will get their school ID, create a semester class schedule, buy a parking and athletic pass, and join a club or Greek organization.

Learning Goals

Explore the decisions that are involved in the Post-secondary Institution (PSI) enrollment process.

Materials

- Event Set-up package
- Booth Materials
- Award Letters and Legers
- Booth Posters
- Booth Flyers
- I joined Photo Prop
- ID Card Photo Prop
- Chance Cards
- Colored Clip Boards (optional)
- Color Spinning Wheel (optional)

15 minutes

Engage

Day Before Activity:

Before participating in the event, facilitate the [School's Out, Now What?](#) activity with your students.

Through small-group activities, research, and discussion, students will be exposed to a variety of careers, along with their average salaries, educational institutions, and postsecondary requirements. Students will learn about a variety of jobs in eight career clusters and the educational institutions' requirements and costs to attend. Students will examine steps you need to take to reach future goals.

Explore and Explain

Teacher's Note: Event Setup

The **Event Setup** packet has resources for planning, meeting, volunteering tasks, and making copies. These resources are designed to start planning at least 8 weeks before your scheduled event.

Prior to the event, print the **Booth Materials** packet and provide copies of the volunteer directions and student facing materials to all volunteers. Take print requests from volunteers as needed. Set up the space for the game prior to the event. On the day of the event, have volunteers manning the booths pass out award letters and ledgers and take attendance.

Award Letters can be assigned a variety of ways based on your preference. You can print out **Award Letter and Ledger** handouts in advance for students to choose from, or they can be fanned out for students to briefly browse as they enter. These ledgers are printed on different colors of paper because, routinely throughout the game, the *Chance* booth will spin a wheel, draw out a color, or call out a color for students with that color paper to come and get one or multiple **Chance Cards** to see what has been thrown at them. Some Chance Cards have good news, some bad. If you do not have access to a wheel, you can have students draw slips of paper or be assigned with ping pong balls or an online random generator. If you don't have colored paper, consider ways you can call students based on other identifiers such as color of their backpacks, shoes, etc.

Future U: The Enrollment Adventure Event:

Students will be given a random award letter that fits the PSI path (career tech or college) they chose in the previous lesson.

Once students have checked in and picked up their career ledger, they are able to navigate to each booth as they choose. They are required to visit most booths, but the choices they make are up to them and their income. After doing a booth activity, make sure that students have a volunteer initial their ledger to show that they visited the booth.

During this event, students use their ledger sheet to track the steps of the process and any expenses they accrue as they explore enrolling in a PSI. These include things like tuition and fees, housing, meal plans, books, and more. Students will also have some social activities to complete, such as getting an ID made, creating a semester class schedule, joining a club/Greek org., and visiting the library and Writing Center.

See the **Booth Materials** attachment for details on what the choices are at each booth. It also includes a detailed instruction page for each volunteer and student-facing materials to aid them as they make life decisions.

Extend

The Day after the Event:

To follow up with students the day after the event, have students participate in a [Four Corners](#) activity. Post one of the four statements "Strongly Agree," "Agree," "Disagree," and "Strongly Disagree" in each corner of the room. Instruct students to navigate to the corner with the statement that best represents their feelings for each of the prompts below. Ask students to share their thoughts after each question.

You can choose to use all or some of the following prompts:

1. I feel like yesterday was valuable.
2. I was surprised by the events I encountered.
3. I knew what to expect BEFORE I played this enrollment game.
4. I had money left over in my Bursar account.
5. I am scared for my future post-secondary education.

When students vote, have them discuss in pairs why they responded the way they did. Then, have one person from each group share out some of the responses.

Teacher's Note: Scholarship Application Support

Students are likely to be feeling stress about the costs of college as a result of this activity. [Can Do](#) is a professional learning guide for supporting students in exploring and applying for colleges as well as for locating scholarships and financial aid.

There is also a student-facing lesson for researching and applying to scholarships: [Me? A Scholar?](#)

Evaluate

As a final reflection, use the [Exclaim and Question](#) instructional strategy.

- *Exclaim: What are you looking forward to with your post-secondary education?*
- *Question: What is one (1) thing that you are confused about?*

Through these conversations, identify “Next steps” that students will need to take.

Research Rationale

The transition from high school to college is a critical period in students' academic journey. Research suggests that a lack of awareness surrounding college transfer and financial guidance can negatively impact students' ability to transfer successfully, particularly for seniors who are first-generation college students (Ricks & Warren, 2021). Several factors support the enrollment of high school seniors, particularly among first-generation students, such as quality guidance counseling and increasing students' college knowledge regarding navigating the admissions process, researching colleges and scholarships, completing applications, and submitting financial aid forms (Ober et al., 2020).

Many high school seniors face financial obstacles that can deter them from college enrollment (Herbaut & Geven, 2019; Ober et al., 2020). The cost of college can range from application fees, housing, tuition, and textbooks. Without financial guidance, students may quickly become overwhelmed and discouraged (Herbaut & Geven, 2019). They also may experience challenges with navigating the financial aid process. However, providing financial aid information and counseling can assist students in developing a clear understanding of the cost of college and successfully navigating the financial aid process (Ricks & Warren, 2021).
