

Stethoscope Placement Guide

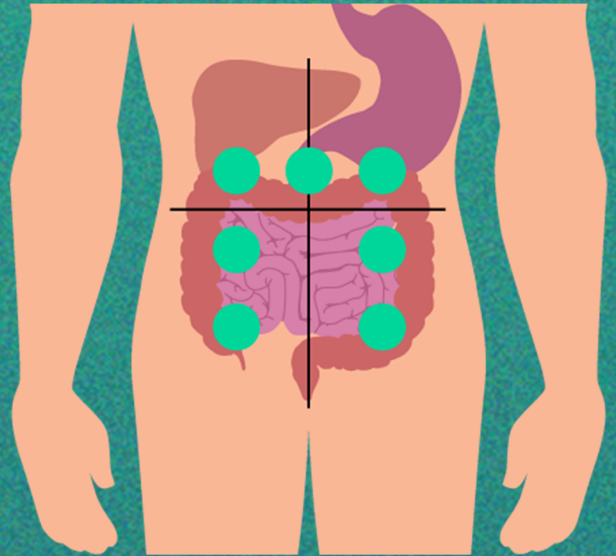

Use the diagrams to guide stethoscope placement (indicated by the dots on the organs). Listen for the same sounds demonstrated in the heart, lung, and bowel videos shown at the start of this activity.

Heart

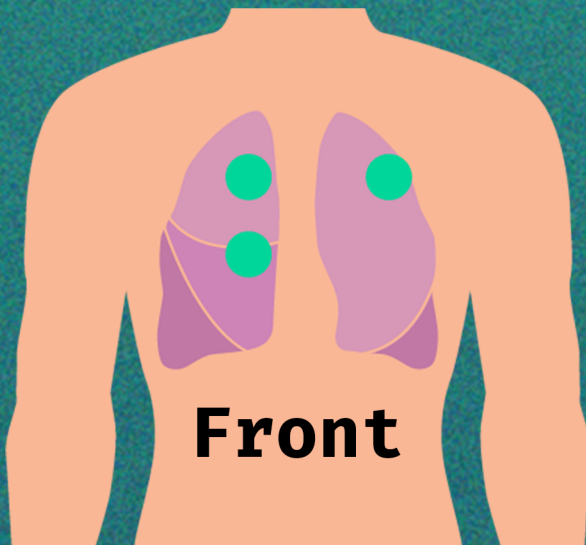

Heart auscultation checks the timing, strength, pitch, and length of heartbeats.

Bowel

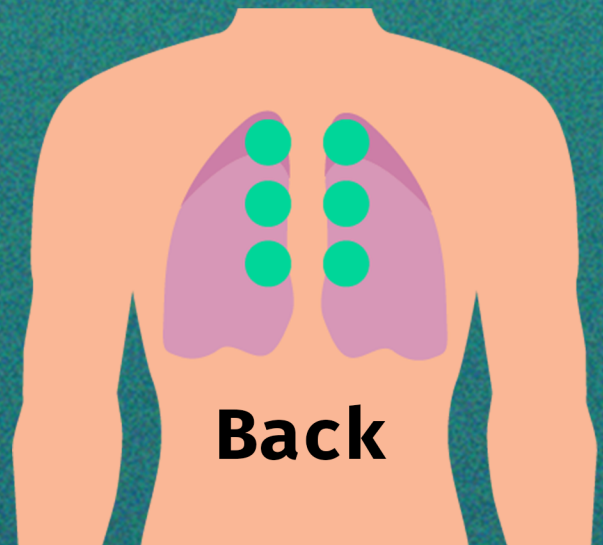

Bowel auscultation checks if bowel sounds are present, how many there are, and their quality.

Lungs

Front

Back

Lung auscultation checks how long, often, loud, and clear your breaths are.
