

THE DETECTIVE BAVARIA

DIGITAL GAME BASED
LEARNING

THE PURPOSE OF "THE DETECTIVE: BAVARIA" is to teach students how to interpret information and come to informed conclusions using that information in real-world situations. Students must learn to discriminate between types of data, understand the different types of sources, and develop the ability to determine the implication of information. Being able to analyze data in this way gives them the ability to combine information from multiple sources to draw conclusions to succeed in the game and in the classroom.
