

## ANIMAL EMBRYO DEVELOPMENT

Using the above graph, color the stage table below to show each developmental week range for each species over the weeks 1 to 8. See chicken example in table. Complete the last column by showing when that animal is born in weeks.

Stage	9	10	11	12	13	14	16	17	18	19	20	21	22	23	Born
Animal															
Chicken	Week 1										Week 2				

1. Which animal species have the most similar developmental stages/weeks?
2. What conclusions about animal type and embryo development can be made from the graph?
