

EVOLUTION RESEARCH DRAFT

Use this handout as a guide to the information you need to gather about your assigned evolutionary principle or type of selection. Divide the work among the members of your group as indicated. Add your name to your assigned section of the table and complete that section. To avoid blogs or biased information, use primarily .org, .gov, and .edu websites for your research. Add the information to the table in your own words.

When you finish filling out the table, review everything as a group, and then turn in this page to receive teacher feedback before you begin creating your slide.
