## TRYING TESSELLATIONS

Tessellations are the repetition of one or more shapes such that the shapes cover a surface with no gaps or overlap. The following tessellation is made up of 1 pentagon repeated, so all of the pentagons are congruent. Use this information to solve for each unknown.

$H = $ _____

$T = $ _____

$W = $ _____

$k = $ _____

$m = $ _____

$x = $ _____
