

RESEARCHING WWI CASUALTIES

- Use the internet to research how many **casualties**¹ occurred in World War I.
- After locating data, create a table that illustrates the number of casualties each country suffered during WWI.
- In your table, include the following information:
 - The name of each country.
 - The continent on which the country is located.
 - Each country's alliance (Allied Powers, Central Powers, or Neutral).
 - The number of deaths.
 - The number of injuries.
 - The total number of casualties.

Use the following internet sources to guide your research.
