

DRAW AN INITIAL MODEL

Drawing

Based on what you've learned about what is needed to sustain an ecosystem, draw an initial model of what you would need to put in your closed ecosystem for it to be self-sustaining.

Reflection

Share your initial model with your group. As your group members share their models, record the similarities and differences you notice among your group's models.

Similarities	Differences

Driving Questions

Do you have any questions before you construct your closed ecosystem?
