## FINDING PATTERNS

Below are three sets of tables: Patterns 1, 2, and 3. Each row has an expression and its result, such as $\log _{2}(32)=5$ or $\log _{b}(4)=3$. Find the unique pattern in each set of tables. Be sure that your pattern works for all three tables within that set.

Pattern 1

| Expression | Result |
| :---: | :---: |
| $\log _{b}(4)$ | 3 |
| $\log _{b}(6)$ | 4 |
| $\log _{b}(24)$ | 7 |

| Expression | Result |
| :---: | :---: |
| $\log _{n}(2)$ | 2 |
| $\log _{n}(15)$ | 8 |
| $\log _{n}(30)$ | 10 |

| Expression | Result |
| :---: | :---: |
| $\log _{m}(4)$ | 6 |
| $\log _{m}(12)$ | 12 |
| $\log _{m}(48)$ | 18 |

## Pattern 2

| Expression | Result |
| :---: | :---: |
| $\log _{k}(32)$ | 20 |
| $\log _{k}(4)$ | 8 |
| $\log _{k}(8)$ | 12 |

| Expression | Result |
| :---: | :---: |
| $\log _{r}(28)$ | 16 |
| $\log _{r}(7)$ | 9 |
| $\log _{r}(4)$ | 7 |

| Expression | Result |
| :---: | :---: |
| $\log _{h}(45)$ | 36 |
| $\log _{h}(5)$ | 15 |
| $\log _{h}(9)$ | 21 |

## Pattern 3

| Expression | Result |
| :---: | :---: |
| $\log _{v}(3)$ | 5 |
| $\log _{v}(9)$ | 10 |
| $\log _{v}(27)$ | 15 |

| Expression | Result |
| :---: | :---: |
| $\log _{c}(5)$ | 12 |
| $\log _{c}(25)$ | 24 |
| $\log _{c}(125)$ | 36 |

| Expression | Result |
| :---: | :---: |
| $\log _{z}(2)$ | 3 |
| $\log _{z}(4)$ | 6 |
| $\log _{z}(16)$ | 12 |
