

## SCHOOL GARDEN PROPOSAL PRESENTATION RUBRIC

	4	3	2	1	Total
<b>CONTENT (DATA)</b>	Includes all necessary data (budget, location, vegetables planted, size, shape, irrigation, impact, management, and potential benefits).	Includes nine of the eleven necessary data (budget, location, vegetables planted, size, shape, irrigation, impact, management, and potential benefits).	Includes seven of the eleven necessary components (budget, location, vegetables planted, size, shape, irrigation, impact, management, and potential benefits).	Includes five or fewer of the eleven necessary components (budget, location, vegetables planted, size, shape, irrigation, impact, management, and potential benefits).	
<b>IMAGES, VIDEOS, &amp; DESCRIPTION</b>	Showcases accurate photos, videos, and description that are clearly labeled including garden blueprint.	Includes photo, video, and description that are mostly accurate and labeled including garden blueprint.	Includes two of the three components (descriptions, video, image) are accurate and labeled.	The site is not represented accurately because multiple visual/text components are missing or incomplete (like not including the garden blueprint).	
<b>ANALYSIS &amp; PREDICTIONS</b>	Soil sample analysis is accurate with evidence. Additional information on how to make the soil more fertile is included.	Soil sample analysis is accurate but does not include supporting evidence as to why.	Includes two of the three components complete with justification (e.g. only has soil test values without plan of improvement data).	Analysis and predictions are incomplete (e.g. missing multiple components and supporting evidence).	
<b>PRESENTATION</b>	Uses information on slides as prompts for narration.	Student reads the text and elaborates comfortably.	Reads the text and adds a few original comments.	Just reads the text.	
<b>ORGANIZATION</b>	Presents information in logical, interesting sequence which audience can easily follow.	Presents information in logical sequence which audience can follow most of the time.	Audience has difficulty following presentation.	Audience cannot understand presentation because there is no sequence of information.	
<b>SUBJECT KNOWLEDGE</b>	Answers all question clearly and completely.	Can answer most questions.	Has difficulty answering many questions.	Unable to answer questions.	
<b>CITING SOURCES</b>	Images, videos and research is properly cited and formatted.	Images, videos and research is properly cited but not properly formatted.	Works cited list is incomplete. Not all work is attributed (e.g. images are not cited).	No attributions are present.
