

CREATE YOUR OWN

Use the guide below to create your own viral post.

Part 1: Pick Your Variables

What are your variables going to be? What are their values? You must have at least 3.

Part 2: Write Your Viral Post

Write at least 4 equations using your variables. Remember the last equation should have your variables, operations, and a question mark, asking to be evaluated.

Part 3: Create an Answer Key

Solve your own viral post. If your answer below matches what you wrote above in Part 1, share your viral post.
