## CARD SORT: FUNCTION CARDS

<p>Focuses the beam to a small precise point.</p>	<p>Serves as the cutting element.</p>
<p>Directs the laser beam where it needs to go.</p>	<p>Protects the laser beam path and maintains alignment.</p>
<p>This is where the laser actually leaves the cutter.</p>	<p>Supplies gas to cool the material and enhance cutting efficiency.</p>
<p>This is the piece you are actually cutting with the laser.</p>	<p>The component that keeps the lens in place.</p>
