

CALCULATOR GUIDE: TI-84 PLUS CE

- 1) Press the **mode** key.
- 2) Press **↓** to move the cursor to the STAT DIAGNOSTICS line.
- 3) Press **→** and then press **enter** to turn that setting on.
- 4) Similarly, turn on the STAT WIZARDS setting.
- 5) Press **stat** then **1** to select **1: Edit...**
- 6) Enter x -values or independent variables into the **L₁** column.
- 7) Enter y -values or dependent variables into the **L₂** column.

Double-check to make sure all numbers are entered correctly!

- 8) Press **2nd** then **y=** to pull up the **STAT PLOTS** screen.
- 9) Press **enter** to select **1: Plot 1**.
- 10) Move the cursor and use the **enter** key as needed so that you see:

- 11) Press **zoom** and then **9** to select **9: ZoomStat**. *You should now see your scatter plot.*
- 12) Press the **stat** key again.
- 13) Press **→** to select the **CALC** menu.
- 14) Press **4** to select **4: LinReg (ax+b)**.
- 15) Use **2nd** then **1** or **2** as needed to select the lists from steps 7–8 so that you see:
 - **Xlist: L₁**
 - **Ylist: L₂**
- 16) Press **↓** and ignore the **FreqList:** setting.
- 17) Press **↓** then **enter** to select **Calculate**.
