

I THINK / WE THINK

In the left column, write down your individual responses to the listed questions below. Discuss your responses with your partner. Then, write your common thoughts in the right column.

- How do the specialized characteristics of your organism influence its growth and survival in the shown environments?
- What makes an organism successful?
- Choose an environment your species wouldn't normally survive in. What mutation would your organism have to develop for it to survive in that environment?

I Think	We Think
