

THE GREAT PLANT DISCOVERY

You and your team of fellow botanists have found a new species of plant. On your poster paper, describe your plant using the following:

1. Create a name for the plant.
2. Determine these **5 characteristics**:
 - Height of plant(s)
 - Types of leaves

- Stem roots
 - Response to stimuli (taste, touch, gravity, light)
 - Protective feature
3. Draw the plant and label the characteristics along with a description of each characteristic.
