<b>Grade Level</b>	6th – 7th Grade	<b>Time Frame</b>	1-2 class period(s)
<b>Subject</b>	English/Language Arts	<b>Duration</b>	60 minutes

### Essential Question

What are the benefits of earning a post secondary degree? How does a GEAR UP grant support post-secondary goals?

### Summary

This lesson is a classroom version of the GEAR UP Student Kickoff assembly which can be found on this site at: Gear UP Student Kickoff-Assembly Version. The link can be found below. School sites participating in the GEAR UP grant can choose how they share the grant information to students. Both versions introduce students to the top ten benefits of continuing their education after high school and how participation in a GEAR UP grant can further their post-secondary aspirations.

### Snapshot

#### Engage

Students will participate in a career choice activity and draw conclusions.

#### Explore

Students will discuss with a partner one of the benefits of earning a post-secondary degree.

#### Explain

Students will identify two of the top ten benefits of continuing their education that are most important to them and review the goals of the GEAR UP grant.

#### Extend

Students will brainstorm as a class and then write an individual note to their future self citing concrete ways that they can better prepare for their future throughout this school year. They will also take a class photo as the Class of 2024 [7th grade students] or 2025 [sixth grade students], sign the GEAR UP banner, receive a GEAR UP button, and take small group photos using the photo props.

#### Evaluate

The Rapid Feedback form will serve as the assessment for this lesson. The teacher might also wish to use the note to your future self as a formative assessment.

## Standards

*Oklahoma Academic Standards for English Language Arts (Grade 6)*

- 6.1.R.1:** Students will actively listen and speak clearly using appropriate discussion rules with awareness of verbal and nonverbal cues.
- 6.4.W.2:** Students will select appropriate language to create a specific effect according to purpose in writing.
- 6.5.W.1:** Students will write using correct mechanics with a focus on commas, apostrophes, quotation marks, colons, and semi-colons.
- 6.8.W:** Students will write independently over extended periods of time (e.g., time for research, reflection, and revision) and for shorter timeframes (e.g., a single sitting or a day or two), vary their modes of expression to suit audience and task, and explain how concepts relate to one another.

## Teacher's Note- Assembly Version Of This Kickoff

An assembly version of the Gear Up Student Kickoff can be found at:

<https://learn.k20center.ou.edu/pd/fc74060730ea745c8c4f356aa2057ca4>

Once class begins, ask students to get out a sheet of notebook paper and fold it hot dog style. The fold creates two columns. Have students label the first column "High School Graduate" and the second column "Post-Secondary Degree Graduate." An example of the format of the notebook paper is on slide 3 of the Student Overview teacher slides. Tell students that today they are going to talk about their future--a future after high school.

Show slide 4. Ask students what it means to be a Post-Secondary Degree Graduate. As you continue to click on the slide, the following answers will appear: someone who earned a degree at a community college, someone who completed training at a career technical school, or someone who earned a degree at a four-year university. Tell students that they will look at careers today and determine if a high school graduate can do certain jobs and if a post-secondary degree graduate can do certain jobs or careers. Show slides five through fifteen. Students are to write the career in one column or both columns based on the questions on the slide.

You can do the first career together with the class as an example. Ask the questions on slide five. Can a high school graduate do this job? Can a post-secondary degree graduate do this job? Answer: Yes a pharmacy technician requires only a high school degree so the high school graduate AND the post secondary degree graduate could do this job. Because the answer is yes for both, the students should write the career name under both headers.

Continue showing the careers on the following slides in this manner, letting students guess what the correct answer should be and writing the career name under the appropriate header or headers on their paper.

After all 10 careers are decided upon, give students five minutes to discuss and compare their columns with [Elbow Partners](#).

Show the correct answers on slide fifteen and let students check or correct their lists. Ask students who has more career choices, the high school graduate or the post-secondary degree graduate. Call on volunteers to answer. Answer: The post-secondary degree graduate has more career opportunities because some careers require more education than a high school diploma.

## Explore

Explain to students that having more career choices gives you career independence--that is the ability to use your degree for more career opportunities. This is one of the benefits of continuing your education after high school.

Show slide sixteen. Ask students if they can think of another benefit of continuing their education after high school. Allow time for students to think about their answers. Pair students together and have them share their benefit ideas with their partners. Have multiple pairs share their answers with the class. This is a K20 Strategy called [Think, Pair, Share](#).

## Explain

Tell students that we will explore 10 benefits that researchers suggest are benefits of earning a post-secondary degree. Hang the posters provided around the room. Read aloud to students each poster and answer any questions that they might have about the explanations. These benefits are also listed on slide 17.

Pass out two sticky notes to each student. Ask students to number the sticky notes 1 and 2 and then write their names on both sticky notes. Students are to choose the two posters that they feel are their first and second most important benefits for earning a post-secondary degree. They will place the sticky notes beside these posters. Once all students have placed their sticky notes, ask for volunteers to explain why they chose the posters that they did.

Tell students that everyone can have all 10 benefits of continuing their education because THIS school has been awarded a GEAR UP GRANT! Display the GEAR UP Grant poster and explain the benefits of the grant. These benefits are also displayed on slide 18. The benefits are: a seven-year grant that continues with the students through high school to support their post-secondary goals, increasing families' college and career awareness, college campus visits, and preparing students for success after high school.

## Extend

Brainstorm with the class behaviors that students can do this year to increase their opportunities for a post-secondary degree in the future. List any ideas on the board. Answers will vary but responses could include: coming to school every day, studying, keeping up with homework, staying organized, keeping their lockers organized, participating in sports or clubs, and participating in music, choir, band, drama or other activities that increase their creativity.

Display slide 19. Ask students to choose one or two behaviors from the brainstormed list and write a note to their future self. Stationary and envelopes are provided in the attachments. Explain to students that these notes will be returned to them at the end of the year to see if they kept their promises to themselves. Ask students to include one of the benefits of continuing their education and why it is important to them. Ask students to put their names on the envelope.

### **Teacher's Note: A Note To My Future Self**

You have the option to use the note as a formative assessment. If you do wish to use the note for a grade, you should ask students to address the envelope to themselves but not to seal the envelope. These notes, once sealed, should be kept until the end of school this year. Students can open them at that time and reflect upon the positive behaviors that they engaged in to continue on their educational path. They can also write about why they were not able to keep the promises that they wrote to themselves and how they can possibly change that behavior next year.

Pass out the student checklist to all students. Tell the class that to demonstrate further that they will support the GEAR UP grant and its goals, they will participate in some GEAR UP activities. Display slide 20 for a list of the activities. The first thing students will do is take a class photo of the future graduating class of 2024 (7th grade) or 2025 (6th grade). A camera and an SD card are provided for that activity.

Students should also sign the GEAR UP banner. This signature is their commitment to participate in GEAR UP activities and to work on positive behaviors that help them on their education path. They may add their graduating class year along with their signatures.

Show photo props and ask students to compare them to the posters of the 10 Benefits. Which photo props are symbols for which posters? Ask small groups to choose photo props and take photos of students with the props in class.

Give everyone a GEAR UP button for completing and participating in this lesson. Tell students that they can collect future buttons at other GEAR UP activities. Their goal can be to collect as many GEAR UP buttons as they can throughout their seven years with the grant.

Pass out the Rapid Feedback form to each student. The form should take students five to seven minutes to fill out. They are to evaluate this lesson, what they learned, and all activities. Use the evaluation form as students' exit ticket for the class.

## Evaluate

The Rapid Feedback form will serve as the evaluation of this lesson. All students should complete the evaluation as the last activity of this lesson. Providing this feedback is a grant requirement, and students can expect to offer feedback at future GEAR UP activities as well.
