Grade Level	2nd – 4th Grade	Time Frame	2-3 class period(s)
Subject	English/Language Arts	Duration	120 minutes

Essential Question

How do adjectives make writing better?

Summary

In this fun and engaging lesson, students will learn what adjectives are and how they are used. Students will read or listen to the story "Dragons Love Tacos," by Adam Rubin. Then, students will engage in a learning game: they each pick a different kind of food and try to describe the food with adjectives as their classmates guess. This lesson features options to suit any classroom, including opportunities for technology integration, differentiation, and extra challenges.

Snapshot

Engage

Students participate in a Collective Brain Dump of adjectives to answer the question, "What do you love most about tacos?"

Explore

Students engage in a Not Like the Others activity.

Explain

Students identify adjectives during an interactive reading of the book "Dragons Love Tacos."

Extend

Students use adjectives to describe different foods while their classmates try to guess what they are.

Evaluate

Students use adjectives as they write an invitation to a taco party for their dragon friends.

Standards

Oklahoma Academic Standards for English Language Arts (Grade 2)

2.5.R.3: Students will recognize adjectives.

Oklahoma Academic Standards for English Language Arts (Grade 2)

3.5.R.3: Students will recognize adjectives, articles as adjectives, and adverbs.

Materials

- Lesson slides (attached)
- Dragon Taco Party Invitation handouts in color or black and white (attached; one per student)
- Sneaky Treat Adjectives handouts (attached; one per group of six students)
- "Dragons Love Tacos," by Adam Rubin
- Lunch-sized brown paper bags
- A variety of foods and snacks (apple slices, orange wedges, bananas, carrots, celery, broccoli, chocolate, caramel, chips, crackers, etc.; one food item per student)
- Crayons, colored pencils, or markers
- Construction paper (optional)

Engage

Teacher's Note: Setting Up

Before you begin the lesson, set up an adjective [Anchor Chart](#) with various categories labeled, such as size, color, shape, number, sound, feel, taste, and smell. Students will be referring to this chart throughout the lesson.

Use the attached **Lesson Slides** to follow along with the lesson. Begin the lesson by displaying **slide 3** and asking students what they love most about tacos. Using the instructional strategy [Collective Brain Dump](#) and the Anchor Chart that you prepared, write down all of the adjectives that students share. They will be using these adjectives later in the lesson and organizing them into categories will help with that activity. When you notice that students are running out of adjectives, check to see if there are any categories that do not have anything listed. Ask guiding questions to get students thinking about those categories and how they pertain to tacos.

Optional Tech Integration

To integrate technology into this activity, have students brainstorm as a group using an application such as [Padlet](#).

Display **slide 4**, and share the lesson's essential question with students: "How do adjectives make my writing better?"

Display **slide 5**, and briefly go over the learning objectives.

Explore

Display **slide 6**, and tell students they will be playing a few rounds of [Not Like the Others](#). Inform them that you will share four words, and their job is to choose which one doesn't belong. Go through **slides 7-10**, and give students time to select the word that isn't like the others.

Student Responses

In each case, three of the words are adjectives, and one is not. The goal is for students to practice as a group choosing the non-adjective in the group of words. When students are sharing out their responses, have them justify their answers by providing reasoning or citing previous knowledge to explain their choices.

Teacher's Note: Sharing

Rather than having one or two students share out each answer, consider having all students participate by writing their answers on a personal whiteboard and holding them up to share. Call on a handful of students to share out how they came to their answers.

Teacher's Note: Differentiation

If you have an older group of students or find that your students need more of a challenge, feel free to change up the word choices. For example, rather than using the words red, five, big, and house, consider using maroon, fifty, gigantic, and dwelling.

Explain

Display **slide 11**, and share the definition of an adjective: a word used to describe a noun.

Display **slide 12**, and tell students that they are going to listen to the story *Dragons Love Tacos*, by Adam Rubin, two times.

- The first time, students will listen for enjoyment.
- The second time, students will pay close attention to the adjectives that the author used. At the end of each page of reading, have students share out any adjectives that describe why dragons love tacos so much. If students hear an adjective that describes why dragons don't like tacos or can't eat them, that's a good reason to share too!

As students share different adjectives, add them to the anchor chart you started in the **Engage** portion of the lesson.

Teacher's Note: Sharing The Story

You can choose to read the story to students yourself or share a [read-aloud](#) version with them.

Embedded video

<https://www.youtube.com/watch?v=GMTCZZp3RbQ>

Extend

Display **slide 13**, and let students know that they are going to pick a food and then use only adjectives to describe that food to members of the class. Their classmates will guess which food the student is describing.

Teacher's Note: Setting Up

Set up a table so that it is blocked from students' view. On the table, place a variety of foods into brown paper bags so that each student will receive a bag containing a single item.

Have students each take a bag back to their tables. At their tables, instruct students to look at the item in their bag but not show it to anyone else. They should then write down adjectives to describe it: its color, texture, taste, etc. The more descriptive they can be, the better.

Teacher's Note: Food Allergies

When selecting foods to have available for your students, be conscious about selecting ones that will not trigger any food allergies that students might have. For example, if you have a student who is allergic to eggs, make sure that none of the options contain eggs or were produced and packaged in a facility that contains eggs.

Once students have written down their adjectives, give them a chance to eat their treats and add even more adjectives to their lists.

Organize students into groups of six, and pass out one copy of the **Sneaky Treat Adjectives** handout to each group. Instruct students to take turns sharing their adjectives with their group. Remind students that the goal is not to give away what their food is, but to share descriptive clues to help their group figure out what the food is.

While one person is sharing, another group member should record the adjectives in the appropriate categories on the handout.

Have groups continue rotating until each of the group members has had an opportunity to share.

Evaluate

Display **slide 14**. Tell students that now that they have had a chance to interact with adjectives in a variety of ways, they are going to make their own invitation to a taco party for their dragon friends!

Pass out a copy of the **Dragon Taco Party Invitation** (in color or in black and white) to each student. Included are two versions of the invitation for you to choose from, a color version and a black-and-white version that students can color themselves. If you prefer, you can also have students make an invitation from scratch.

On their invitations, students should include basic information about *who*, *when*, and *where*. But the most important information for students to focus on is the *what* and *why*. As they write their what and why descriptions, they should take the opportunity to use the adjectives that they learned about and describe the types of tacos their dragon friends can expect to find at the party!

Teacher's Note: Differentiation

If you have struggling writers in your class, consider providing them with the basic information of the *who*, *when*, and *where* for the invitation as well as sentence frames to help them with their *what* and *why* descriptions.

Encourage students to refer to the anchor chart that you have added to throughout the lesson as they are writing their descriptions. When they are finished writing, have students turn in their invitations as assessments for the lesson.
