**Time Frame** 90 minutes

## Essential Question(s)

- How can equity be promoted for all stakeholders?

## Summary

In this professional development, participants will reflect on equity in their school. They will work in groups to create images that represent equity, read through an equity research brief for theory and practice, and discuss educational case studies and how they can work to provide equity in different situations. The session wraps up with participants reflecting on how they can nurture equity in their schools and on their teams.

## Learning Goals

- Identify the research-based elements of equity.
- Apply concepts from research to case studies and conversations.
- Generate goals to foster equity in your professional community.

## Materials

- Presentation Slides (attached)
- Case Studies (attached, cut apart)
- Magnetic Statement Table Tents (attached, one per session)
- Equity in Practice Research Brief (attached, one per participant)
- Planning for Equity handout (attached, one per participant *and* one per group per activity)
- Equity Research Brief handout (attached, one per participant)
- Chart Paper
- Markers (one set per group)
- Blue, Yellow, and Pink highlighters (one set per participant)
- Sticky notes

# Engage

## Presenter's Note: Presentation Setup

Print the attached **Magnetic Statement** tents. Fold and place each tent on its own table or in its own area, spacing them out throughout the room.

## Optional Alternative for Smaller Groups

The attached Magnetic Statements document includes eight statements. If you have a small group, unhide **slide 5** and use only statements 1–4.

Use the attached **Presentation Slides** to introduce the session.

Display **slide 3** and introduce the participants to the [Magnetic Statements](#) instructional strategy. Inform them that you will present them with eight statements about equity. Participants should read each statement and choose one that they are most attracted to or that they agree with the most.

Display **slide 4** and read the statements to the participants. As you read them, point out where they are in the room. Have the participants move to the table with the statement they have chosen. Once all participants have chosen a statement, provide them time to discuss, as a group, why they chose the statement and what stands out most to them. Ask for volunteers from each group to share what they discussed about their statement. Emphasize that all statements are correct and important to implementing equity in schools.

Display **slide 6** and share the essential question with participants: *How can equity be promoted for all stakeholders?*

Move to **slide 7** and share learning objectives with participants.

## Explore

Have participants stay in their statement groups. Introduce the [GramIt](#) instructional strategy. Display **slide 8** and ask groups to use this strategy to create an image that represents their group's idea of equity. Each group should add a caption and hashtag to their image to help explain their understanding of equity. Provide each group with a piece of large chart paper and markers. Give the groups 15–20 minutes to complete their images.

Once each group has completed their image, display **slide 9** and pass out a stack of sticky notes to each group. Depending on your preference, either have participants hang their posters around the room or have them leave their posters face-up on their tables. Using the [Gallery Walk](#) strategy, have participants walk around the room to view the images of other groups. Participants should leave comments on other groups' images with their sticky notes. You may wish to have participants continue the Gallery Walk until they have seen a small selection of other groups' images (at least three others) or until they have seen all the images in the gallery.

Give participants time to view and comment on other images. Let them know they will be revisiting their images later in the session, but for now, they can set them aside.

# Explain

## Presenter's Note: Categorical Highlighting

The following activity requires each participant to use a blue, yellow, and pink highlighter. If you do not have a blue, yellow, and pink highlighter for each participant, adjust the directions on slides 10 and 11 to reflect what colors you would like participants to use.

Display **slide 10** and pass out a copy of the attached **Equity Research Brief** to each participant along with a set of blue, yellow, and pink highlighters. Inform participants that they will be reading the research brief and using the [Categorical Highlighting](#) instructional strategy. As they read the research brief, they should highlight the following:

- Blue: Something they are doing well at their site.
- Yellow: Something they have seen at their site, but it's not happening consistently.
- Pink: Something they wish were happening at their site, but it's not currently in practice.

Give participants 8–10 minutes to read through the brief individually.

After participants have finished reading the research brief, display **slide 11**. Have participants share with their table group a few key highlights for each color. Encourage them to focus on what they highlighted in yellow and pink. After groups have discussed, display **slide 12** and have one spokesperson from each group share one key takeaway from their discussion.

# Extend

## Presenter's Note: Preparation

Before the following activity, print and prepare the attached **Case Studies** handout. The handout contains six case studies across three sheets of paper. Prepare one case study (one half-sheet) for each group of 5–7 participants, printing duplicates of the handout as needed. Print handouts one-sided and cut them in half before the activity begins.

Display **slide 13** and ask participants to regroup into groups of 5–7. You can have them regroup by teams, schools, or mixed groups. Pass out a copy of the attached **Planning for Equity** handout to each participant.

Display **slide 14**. Pass out one of the six **Case Studies** half-sheets to each group. The case studies in this handout focus on equity for students, teachers, and events.

Go over the goal areas for the Planning for Equity handout with participants, pointing out each of the four goal areas: resources, interventions, high expectations, and cultural recognition. Ask participants to come up with an example goal for each area.

## Sample Responses

If needed, provide the following examples for each goal area.

- **Resources:** Provide a laptop to the student.
- **Interventions:** Provide academic supports (tutoring, mentoring, etc.), translation, language line (support).
- **High Expectations:** Build relationships within the school community, and foster a growth mindset and accountability.
- **Cultural Recognition:** Choose literature to fit the culture and reading level of the students. Choose material that addresses students' most prevalent need as a group. Offer translation. Communicate with families.

Have each group read through their case study and fill out the Planning for Equity handout.

Allow enough time for groups to finish reading individually and discuss possible interventions for their case studies, considering each goal area in the Equity in Practice Research Brief. Once all groups are done, have a spokesperson from each group share one equity-related challenge they identified and a solution they discussed.

## Evaluate

Display **slide 15** and have participants revisit their GramIt images from the Explore phase. Ask participants to take what they have learned so far in the session and discuss connections between their images and changes they might make to their own image. Have the groups make those changes add sticky notes to explain possible tweaks. Once all groups have had time to reflect on their images, have each group share one change they made or would make.

Have participants get back into the groups from their site, subject, or team. Display **slide 16** and pass out one copy of the attached **Equity in Practice Research Brief** to each participant. Additionally, pass out a new copy of the Planning for Equity handout to each participant.

Ask participants to apply what they have learned to their own site or team. They should first read through the practice portion of the research brief and then review their Categorical Highlighting notes from earlier. Next, have participants fill out their own Planning for Equity handouts for their team or school. Give participants enough time to read the research brief, discuss, and fill out the handout.

If groups are comfortable doing so, have them share out one thing they would like to try at their site. Encourage the groups to take their Planning for Equity handouts back to their site and implement what they have learned and discussed in this workshop.

## Research Rationale

Many have defined equity involving equal opportunities (Luke et al., 2013) for all students (Majzub, 2013). Equity doesn't just involve providing individual support for all students, but for all students to achieve equal levels of success (Leithwood, 2021). The K20 Center's IDEALS defines equity as "a fair and just principle which strives to ensure that the community needs of all social identities are recognized, respected, and met and that holds high expectations for all, adjusting for differentiation and personalization based on individual needs." This requires setting high expectations, providing positive leadership in schools, student-centered and accessible learning, culturally responsive teaching with differentiated instruction, and working with all stakeholders (Ainscow, 2020; Fletcher et al., 2019, Leithwood, 2021; Marcos et al., 2021; Nadelson et al., 2019; Onyishi & Sefotho, 2021). For this to be achieved schools must implement schoolwide systematic strategies for their ever changing populations that focus on meaningful learning and student achievement (Shields & Hesbol (2020). This begins with authentic dialogue leading to a shared vision and values by the teachers and administrators (Teemant et al., 2021).
