**Time Frame** 60m

## Essential Question(s)

- How can micro-credential courses benefit teachers?

## Summary

In this professional learning session, participants will discuss barriers to traditional professional development and explore how micro-credential courses can help them overcome those barriers. Participants will discuss the pluses and deltas of micro-credentialing, explore a sample course activity, learn how to enroll in classes, discuss how badges can be used, and identify topics they would like to see addressed in future micro-credential courses.

## Learning Goals

- Discuss the pluses and deltas of micro-credentialing.
- Identify the steps to enroll in, access, and complete a micro-credential course.
- Reflect on how micro-credential courses could inform your practice.

- [Mirror, Microscope, Binoculars—Professional Development, but Fun-Sized.pdf](#)
- [Presentation Slides—Professional Development, but Fun-Sized.pptx](#)

## Materials

- Presentation Slides (attached)
- How People Learn Flowchart handout (attached; one per participant)
- Mirror, Microscope, Binoculars handout (attached; one per participant)
- Micro-Credentialing Course Interest Form handout (attached; one per participant)
- Device with internet access (one per participant)
- Pen or pencil (one per participant)
- Sticky notes, two different colors (one of each color per participant)
- Chart paper or whiteboard
- Current micro-credential course flyers (see Facilitator's Note in the Explain portion)

10 minutes

## Engage

Use the attached **Presentation Slides** to guide the session. Display **slide 2** and introduce the session and yourself to the participants.

Transition to **slide 3** and invite participants to reflect on the prompt on the slide: “What barriers prevent you from seeking professional learning opportunities outside of school hours?” Use the [Think, Pair, Share](#) instructional strategy and have participants individually consider their response for a moment. Have participants then find a partner near them. Invite pairs to have a short discussion about their individual responses, then ask volunteers to share their thoughts with the whole group.

Move through **slides 4–5** and share the essential question and learning objectives.

10 minutes

## Explore

### Facilitator's Note: Activity Preparation

Prior to this activity, prepare a [T-Chart](#) on a large piece of chart paper or whiteboard. Label one side of the T-Chart "Pluses of Micro-Credentialing" and the other side, "Deltas of Micro-Credentialing."

Display **slide 6** and tell participants they will watch a short video about micro-credentialing and complete a related activity. Play the video, [What is Micro-Credentialing?](#)

### Embedded video

<https://youtube.com/watch?v=ZNOOr-0o7ink>

Transition to **slide 7** and have participants review the image on the slide, which details the typical sequence of activities in a micro-credential course. Display **slide 8** and pass out the attached **How People Learn Course Flowchart** handout to each participant. Have participants individually read the chart. Explain that this flowchart details the course activities participants complete during the *How People Learn* micro-credential course.

### Facilitator's Note: Sticky Note Colors

Prior to this portion of the activity, edit **slide 9** to replace the highlighted text with the colors of the sticky notes you are using.

Move to **slide 9** and introduce the [Plus Delta Chart](#) instructional strategy. Pass out two different colors of sticky notes to each participant. Have participants write one "plus" of micro-credentialing on one sticky note and one "delta" of micro-credentialing on the other sticky note. Start the [3-minute timer](#) on the slide and allow participants time to work.

Display **slide 10**. Have participants bring their sticky notes to your prepared T-Chart and have them place their pluses in the plus column and their deltas in the delta column. Choose a few sticky notes to read aloud from each column. If time permits, invite participants to expand upon their pluses and deltas.

Move to **slide 11** and share the variety of pluses and deltas of micro-credentialing on the slide. Highlight points that participants did not previously address and share that these are all things participants may keep in mind when completing a micro-credential course.

15 minutes

## Explain

### Facilitator's Note: Micro-Credential Course Flyers

Prior to the session, contact the K20 Center to obtain flyers with the current micro-credential course offerings. Share flyers with participants during this phase of the session.

Move to **slide 12** and direct participants to use the displayed QR code or short link to access a digital [Card Sort](#).

Tell participants the digital Card Sort is demonstrative of a typical micro-credential course activity. Explain that they should complete the activity by dragging and dropping the steps necessary to complete a micro-credential course in chronological order from beginning to completion. Have participants select "Run Game" to begin. Start the [five-minute timer](#) on the slide.

Display **slide 13** and have participants find a partner. Have participants share how they sorted the cards individually, then have pairs work together to re-sort their cards, if necessary. Allow as much time as you believe necessary for pairs to complete the task. Consider using the [Fist to Five](#) instructional strategy to have participants demonstrate how much time they need to finish re-sorting the cards.

Display **slide 14** and reveal the correct order of steps to complete a micro-credential course.

Move to **slide 15** and play the [Micro Creds Testimony](#) video featuring testimonials from teachers that have completed micro-credential courses.

### Embedded video

<https://youtube.com/watch?v=yokb3XMHQg?feature=shared>

Display **slide 16** and provide time for participants to review the current course offerings.

15 minutes

## Extend

Display **slide 17** and pass out the attached **Mirror, Microscope, Binoculars** handout. Have participants use the [Mirror, Microscope, Binoculars](#) instructional strategy to reflect on their view of micro-credential courses. Allow participants approximately two to three minutes to work, then show **slide 18**. Invite participants to share out some of their reflections.

5 minutes

## Evaluate

Move to **slide 19** and pass out the attached **Micro-Credential Course Interest Form** handout to each participant. Tell participants this form is optional, but they are encouraged to use the form to ask questions, express interest in a specific course, or suggest courses they would like to see offered in the future. Collect forms and review responses, then answer any outstanding questions if time permits.

## Research Rationale

Micro-credential courses are used for any level of learning and for any topic (Rimland & Raish, 2019). Micro-credential courses are useful for teaching learners specific skills and for filling in gaps in job-related knowledge (West & Cheng, 2023). These courses allow participants the opportunity to apply their learning to job-specific situations, which might have better results than a typical professional development training (Bartz & Kritsonis, 2019).

Learners are given a goal to achieve in order to successfully complete a micro-credential course and earn the associated badge (Carbaugh et al., 2022). A badge provides proof that a skill has been learned (Clausen, 2022; Rimland & Raish, 2019), and serves as a visual representation of that skill (Clements et al., 2020; Fanfarelli, 2020; Leaser et al., 2020). Earning a badge could provide motivation for a learner to finish the course and might also create a sense of achievement (Newby & Cheng, 2020; West & Cheng, 2023).
