

AIRPLANE HANDS-ON

1. Fold the paper in half the long way (hot dog style). This makes a long, skinny rectangle. Then, open it back up.
2. Fold the top two corners down. Bring each top corner to the middle fold line. Now the top looks like a triangle.
3. Fold the triangle down. Take the triangle flap you just made and fold it down, so it touches the bottom edge.
4. Fold the top corners again. Fold the new top corners down to the middle line, just like before. You'll see a smaller triangle underneath.
5. Fold the small triangle up. Fold that little triangle up over the corners to hold them in place.
6. Fold the whole paper in half. Fold it along the original center line, so the triangle is on the outside.
7. Make the wings. Fold each side down to make wings. Try to make them even!
