

INSTRUCTIONAL STRATEGIES

SMART Goals

By following the SMART goals criteria, students, teachers, and schools can set actionable, clear, and realistic goals that increase the likeliness of achieving desired outcomes.

SMART GOALS

Summary

A SMART goal is a goal with a specific, measurable, achievable, relevant, and time-bound objective. This framework is used to provide clarity and structure to goal setting, making objectives easier to track and accomplish. To use this framework, students will write a goal that incorporates a set of components that ensures a systematic approach achieving the stated objective. Use this example: "I will get an A on my current essay in my English class."

Procedure

1. **Specific.** The goal should be clear and well-defined, answering the "what," "why," and "how" of the objective. The example goal identifies which class and what assignment: "I will get an A on my current essay in my English class."
2. **Measurable.** The goal should include criteria to track progress and determine when the goal has been met. The example gives a measure of "A" as the grade you aspire to achieve on this assignment.
3. **Achievable.** The goal should be realistic, attainable with effort and resources available. For example, an A is achievable because you earned a B on your last essay.
4. **Relevant.** Your goal should align with broader objectives or values. In the example — earning an A on the current essay — this short-term goal might relate to a broader goal of earning an A in the English course and graduating in the top 10% of the senior class.
5. **Time-bound.** A specific timeline for completion should be established. The example goal indicates "current essay," which probably has a specific due date assigned to it by the teacher.

Doran, G.T. (1981). There's a SMART way to write management's goals and objectives. *Journal of Management Review*, 70, 35-36.
