

# INSTRUCTIONAL STRATEGIES

## Two Stars and A Wish

Two Stars and a Wish is a reflection strategy designed to provide student feedback via peer- and self-assessment. Students consider a recent activity, lesson, event, etc., and respond with two positive (stars) and one hopeful (wish) reflection.

## TWO STARS AND A WISH

### Summary

This instructional strategy gives students an opportunity to self-reflect and provide feedback to peers. This strategy can be used at any point in a lesson, but is best utilized following an activity or a presentation, when peer-reviewing a classmate's work, or for self-reflection on an assignment. Prompted by one of these events, students identify two areas that went well (stars) and one area that could be improved (a wish).

### Procedure

1. First, have your students take a moment to quietly reflect on the activity, presentation, event, etc.
2. Next, have students work individually to write down, or share out, two areas which they liked, or feel positive about—the stars.
3. Finally, have them write down, or share out, one area that they feel could be improved—the wish.
