

Two Stars and A Wish

Two Stars and a Wish is a reflection strategy designed to provide student feedback via peer- and self-assessment. Students consider a recent activity, lesson, event, etc., and respond with two positive (stars) and one hopeful (wish) reflection.

TWO STARS AND A WISH

Summary

This instructional strategy gives students an opportunity to self-reflect and provide feedback to peers. This strategy can be used at any point in a lesson but is best used following an activity or a presentation, when peer-reviewing a classmate's work, or for self-reflection on an assignment. Prompted by one of these events, students identify two areas that went well (stars) and one area that could be improved (a wish).

Procedure

- 1. First, have students take a moment to quietly reflect on the activity, presentation, event, etc.
- 2. Next, have students work individually to write down, or share out, two areas which they liked or felt positive about—the stars.
- 3. Finally, have them write down, or share out, one area that they feel could be improved—the wish.
