

MASCOT & PENNANT DESIGN

Materials:

- Device with Internet Access
- Activity 2 Handouts and Notes
- Career Cluster Infogram: <https://tinyurl.com/k20centercareerclusters>
- Mascot Pennant Pattern
- Something to write with
- Coloring supplies (crayons, markers, colored pencils, etc.)
- Scratch paper for sketching (optional)

Instructions:

1. Start this activity by reviewing information about your winning career cluster from Activity 2. You can use your **K.I.M.S. Notes**, **Fruiter Model**, and **Two-Voice Poem** handouts. First decide whether or not you are going to create a mascot to represent the whole cluster or just one specific job from the cluster.
2. Using your observations and previous work, what image comes to mind that can visually represent your final career cluster/job?
3. Look back at the Career Cluster Infogram to help you brainstorm ideas for your design. You will notice the icons and images on the cluster infogram slides that can be helpful in creating your mascot. Sketch your ideas on a scratch piece of paper, if that is helpful.
4. Create your final mascot design on the Mascot Pennant Pattern Handout. A pennant is a type of flag used to represent a team. Your pennant should include:
 - a. Your cluster or job name
 - b. The mascot
5. Finalize your pennant by coloring it in and decorating it in a way that best represents your cluster or job.
6. Once you have finished your mascot, share it with a friend, family member, or teacher.
