FLIP

Summary

Flip (formerly known as Flipgrid) is a digital tool that provides teachers with the ability to facilitate video discussions and increase the opportunity for student voice. Teachers can create topics that students respond to by recording videos. As students respond to the prompt, their videos are displayed in a grid and appear as a digital discussion board. Students and the teacher can open a discussion by posting video responses to others' videos.

Procedure

1. Create a free Flip account at <https://info.flip.com/>.
2. Add a topic or question to prompt student responses.
3. Set sharing permissions.
4. Share the topic with students.
5. Review and evaluate student responses.
