

## Create A Graph

Create various types of graphs to communicate your information and data.

LEARN.**K20**CENTER.OU.EDU/STRATEGIES

## CREATE A GRAPH

### Summary

Create a line, bar, area, pie, or scatter plot graph to display your data.

### Procedure

1. Select a graph type.
2. Use the tabs on the right for each step.
  1. Design - Choose direction, shape and style. Note that choices depend on the type of graph.
  2. Data - Enter the title, X and Y labels, item labels and values.
  3. Labels - Choose font, size and color.
  4. Preview - Check that your graph is correct.
  5. Print and Save - Print, download or email your graph.
3. See the tutorial on the main page for more details.
