AUTODRAW

Summary

Autodraw enables the user to create digital content without creating a login or downloading any program. This can be used to create notes, posters, flyers, and so much more. All content can be instantly downloaded or shared.

Procedure

1. Navigate to autodraw.com.

2. Select "Start Drawing" or visit the tutorial "Fast How-To."

3. Use the toolbar on the left to select and change tools as you create.

4. Select the "Autodraw" tool.

5. Use the pen to draw the image you want to create.

6. At the top of the screen, scroll through the image choices until you find the one that you drew. Select it.

7. You can edit color, size, and rotate the image.

8. Continue adding content until you have created your digital content.

9. Select the hamburger on the top left.

10. Select "Download."

11. Name your digital content and select "Save."

12. The digital content is now downloaded on your device as a PNG.
