

## Suno

Suno is a website that uses Artificial Intelligence (AI) to allow users to create their own songs with lyrics and music. Music has a way of adding student voice and engagement to any lesson.

## SUNO

### Summary

Suno provides a unique platform for students to explore music composition, foster creativity, and develop a deeper understanding and appreciation of music through AI technology. While this is a free resource, there is a 30-credit (or 3-song) limit that renews daily.

**Note:** Chatbots can misinterpret information, present information in a misleading or unbalanced way, and/or plagiarize the work of others. Always check the validity and originality of the content gleaned from a chatbot source.

### Procedure

1. Access <https://suno.com/>
2. Select "Create" from the left-side menu.
3. A simple way to get started is to type in a short description (up to 200 words) of the song you want to create.

This feature can be used for a quick summary of a topic or to just create the mood for your lesson.

4. If you hit the toggle for "Custom" you are presented with more options for specific creativity.
5. Lyrics: Type in your own lyrics (up to 3,000 words) or select "Make Random Lyrics" to jumpstart the brainstorming process.
6. Style of Music: Select options at the bottom or describe the style of music or tone you want your song to sound like. This can be used to set the historical mood for a lesson. For example, if you're reading about the American Revolution you can have Suno create a playlist of music from that era.
7. Title: Enter a title to remember your work by. Then hit "Create."
8. For either option (custom or not), you can toggle "Instrumental" and you'll get just music without lyrics.

Suggested Uses:

1. Students can use Suno to create summaries of lessons and use the songs as a study guide.
2. For an ELA class, ask students to create a playlist for specific characters you're reading about and then analyze what the AI created for accuracy or explain what they would have done differently.
3. For a Music class, ask students to explore different genres of music and practice mixing or creating lyrics.
