

Video in Padlet

Padlet is a web app that works like a digital bulletin board. Learners can record a two-minute video of themselves and upload it to a shared board, allowing them to collaborate further with their fellow learners.

VIDEO IN PADLET

Summary

Padlet is a free, digital bulletin board that can be used for a variety of online learning activities. Learners can record a two-minute video of themselves and add it to a shared bulletin board, allowing for further collaboration, exit tickets, brainstorming, and more.

Procedure

- To set up your Padlet, use the instructions on the <u>Padlet</u> Tech Tool Card
- Once your Padlet is ready for use, instruct your learners to create a post by selecting the "+" icon at the bottom right corner of the screen.
- 3. Then, direct them to select the "+12" button on the right side of the post box. This will show all options for attachment types.
- Learners should select the "Video recorder" option. This will open a window for learners to record a video of themselves, up to two minutes long.
 - Instruct learners to select the correct camera and microphone options at the bottom of the window.
- Direct learners to select the camera icon at the bottom of the window when they are ready to record. The recording will begin immediately.
- Learners may pause, stop, watch back, discard, and re-record their video until they are satisfied with it.
- When their video is ready, ask learners to select the "Playback and save" button in the top right corner of the window. Then, select "Save" again.
- 8. Once the video has been added to their post, learners may complete their post by adding a "Subject" as well as any additional text needed to the caption before posting.
- 9. When the post is ready, instruct learners to select the "Publish" button, which will add the post to the Padlet bulletin board.
