THETAWISE

Summary

Thetawise offers personalized math tutoring using a large-language model (LLM). The LLM provides explanations of mathematical concepts, hints when learners are stuck, generates step-by-step solutions, and even helps check homework. Educators can use this tool to supplement instruction, differentiate learning, and track student progress. The platform encourages self-paced exploration while reinforcing foundational skills, making it ideal for homework support, intervention, or enrichment activities.

Procedure

1. Go to https://thetawise.ai/
2. Type a question in the chat box. Continue the discussion by asking your own questions or using the suggested prompts to guide your questioning.
3. Alternatively, select “Log in” for additional functionality. Thetawise can recognize photographed, handwritten, or spoken math. Log in to upload images of a math problem, to draw the problem, or to use speech-to-text to describe the problem.
4. Thetawise can also create AI-generated explanation videos or practice problems. In the left-side menu, perform the following steps:
    1. Select “AI Videos” for an AI-generated video explanation on the given topic.
    2. Select “Practice Sessions” for unique AI-generated problems on the given topic.
5. The chatbot also lets you determine the type of interaction you want. Ask Thetawise for any of the following:
    1. The answer to a problem.
    2. A hint to help solve the problem.
    3. Additional tutoring to guide users through a solution.

Please note that the free version limits users to 50 chats per 24 hours.
