TECH TOOLS

# Adobe Podcast

Users can record and edit audio in a web browser. Adobe Podcast removes background noise and enhances the quality for podcasts, interviews, and voice recordings.

# ADOBE PODCAST

## Summary

Use Adobe Podcast to record and edit podcasts or any audio project easily. This tool also transcribes audio, enhances the quality with AI, provides royalty-free music, and converts audio into audiograms (videos with captions).

## Procedure

1. Navigate to https://podcast.adobe.com/en.
2. Sign in or create an account.
3. To create a podcast or voice recording, select “Record a Podcast.”
4. Select “Start recording.”
5. Select “Start recording” from the Edit page. The recording will start immediately.
6. When you are finished, select “Stop Recording.”
    1. Start and stop recording as needed.
7. Wait for the Adobe Podcast to generate a transcript. This can take anywhere from a few seconds to a few minutes.
8. Make changes or adjustments
    1. Select “Edit” to delete portions.
    2. Select “Add” to upload additional audio.
    3. Select “Music” to add a royalty-free track
    4. Select “Filters” to toggle the AI enhancement feature on.
9. When you are ready, select “Invite guests” to create a shareable link or to email someone you are recording.
