TECH TOOLS

Keynote

With Keynote, it is possible to create slide-based presentations.

KEYNOTE

Summary

Keynote makes it easy to create and share presentations on an iPad or iPhone.

Procedure

1. Open Keynote, select a theme, and start creating!
2. Collaborate with others on your presentation by selecting the “Add People” icon (silhouette with a “+” sign).
3. Select the “more” menu by clicking the three dots inside the circle for a list of other options available, including options to share, export, print, and many more.
