TECH TOOLS

WeVideo

WeVideo is an easy-to-use video creation tool. Whether students are learning in person at school, from a distance, or in a blended setting, WeVideo allows them to create, collaborate, and express themselves with a learner-centered approach.

WEVIDEO

Summary

WeVideo gives teachers and students a free and easy way to create videos that can be downloaded or shared directly to Google Drive, YouTube, Dropbox, and more. To create videos, students and teachers can start with a template, record with a device, or import pre-existing media.

Procedure

1. Go to WeVideo and select **Login** or **Sign up**.
2. Select **Create New** or choose a template.
3. Import videos, images, or audio.
4. Edit the imported contents using the program's tools. Use the provided assets or create your own visuals from scratch.
5. Once the project is complete, select the **Finish** button.
6. Select a destination to save the video.
7. Select **Export**.
